About Us / Overview

RMM Communications Systems Pvt. Ltd. a manufacturing & service providing organisation incorporated in 2007 is a sister concern of Mukherjee Industries, having businesses all over India since 1960, with corporate office in Kolkata and equipped workshop facilities at Halisahar (right beside the National Highway and 35 mins driving distance from Kolkata International Airport)apart from 20000 sqft free space in which we plan to build multi facilitated warehouse facility.

The main products of parent organisation includes sensor loop for belt rip protection system, electrical distribution & control equipment, communication systems including fire detection alarm & protection, ferrous and non-ferrous fabrication products, supply, erection & commissioning of various material handling system and safety & health related equipment.

RMM has also ventured in IT field providing successful solutions to enterprises worldwide independently as well as with partner organisations.

With speciality practice teams in most industries and virtually every functional discipline, we provide our clients with high quality, seamless service.

RMM has built and sustained a reputation of excellence in Information Technology; IT enabled Services, and Business Process Outsourcing.

Our verticals: Education, Telecom, Finance, Banking, Health, Education, Retail, Manufacturing and Agro-Industry.

With a firm foot hold on competitive Indian market we start our Global presence in a very quick span .Our client portfolio consisted of organisations from the US, Europe and the Middle East. Recently, RMM has ventured into East Africa with services that include IT advisory and Auditory services apart from the services already mentioned above.

We are introducing a new slice of our business processes SHERQ (Safety, Health, Environmental, Risk and Quality Management) consultancy.

Our Mission

Our mission is to concentrate on specialization that match customer requirements and to deliver valuable service that can exponentially fuel the growth of business enterprise, to provide innovative offline and online technology solution and to maintain better understanding of the problems faced by its client so that the solutions could always meet the changing needs of the business. To provide the best in class solutions to customers using the state of the art tools and technologies to help maximize their ROI.

Our Vision

RMM Communications Systems Pvt. Ltd. envision to be a trusted IT solution provider in the industry to create and deliver Innovative Processes with state-of-art that increase efficiency. RMM Communications Systems Pvt. Ltd. is deeply committed to enhance the business value of Client through technical excellence.

Effectiveness - We do more analysis to get to know more about their individual and business needs to merge the thoughts and ideas of clients ensuring improvement in their business through IT solutions.

Expertise - We take the time to understand your business needs and to create cost-effective solutions that optimize efficiency and deliver results that will exceed your expectations. It is the dedication and enthusiasm of the developers that has made it possible to beat our competitors by our consistent quality of work.

Our Present Business Process

Electro-Mechanical

This is comprising of Fabrication and Erection of all kinds of MS Structural assemblies with special surface protection, Supply and Installation of LV and MV electrical power distribution equipments, Erection & Maintenance of HV Power Transmission lines and Substations.

Electronics & Communication

This includes Design, Supply, Installation, Testing & Communication of Surveillance system for Industrial and Commercial Premises Security, Smart Sensor driven Process & Asset Preventive Smart Maintenance system for Manufacturing Process. Public Address System, Access Control, OFC LAN Network, Fire Detection & Protection System, System automation and Field Instrumentation and Fully automated Signaling System for Indian Railways (S.E.R)

IT and IT enabled processes

This includes Internet of Things, Application of Artificial Intelligence, Mobile Gaming Software, Improvement of NoC operational efficiency of mobile communication for reduction of Mobile Tower downtime.

Especially processed wooden manufacturing

Manufacturing of especially processed (chemical treatment) wooden products like Crate, Spool and Packing materials from imported woods.

Project Management Services

Project Management Consulting with latest Tools, Techniques and software for Infrastructure, Steel, Power projects including IT / ICT roadmap.

Our Future Aspirations

- Supply of Storage Tank and Vessels for any type of liquid materials
- Supply and Installation of Solid Waste Management System
- Application of Smart Pump for domestic and industrial uses
- Implementation of Cyber Security
- Supply and Installation of Smart Irrigation System using solar pump for small to medium scale farmers
- Implementation of Smart Metering System for Electricity Consumption in domestic urban use for implementation of energy efficient power distribution and prevention of power theft.
- Application of Specialized Packing Materials
- Manufacture and Supply of Specialized Hospital furniture with Smart Assistance features
- Solar power project –Roof top and Ground Mounted Grid Tie system up to 1 MW
- Implementation of Mobile Apps solution for optimal and efficient uses of man machinery and other resources
- Application of Composite Materials like in the areas of Automobile, Electrics, Electronics, Corrosive Chemical Handling and Cooling Towers In collaborative approach.

Electro - Mechanical

Supply & erection of MS Fabrication/structural Items including specialized fabrication (Powder Coated) of any size and type (eg: Crates, drums, spool, flat reel, battery racks, building structures & sheds, IT hardware parts, PCC, MCC panel, conveyor structures, Material Handling/Mining machines etc)

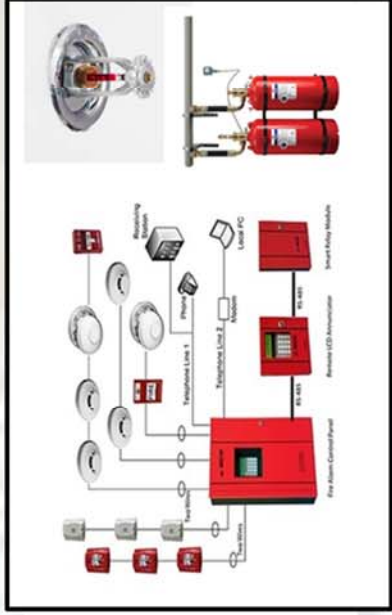

Supply of 3 Phase Distribution Transformers of capacity 10 / 16 / 25 / 63 / 100 KVA, Current & Power Transformers and Control panels.

Installation and Maintenance work for HV Power Distribution System including 132 KV Transmission Line and Sub-Station (eg: Rural electrifications).

Supply & Installation of Sensor Loop for Conveyor Belt Rip Protection. Surface protection work for Conveyor Belt with silicon coated paper (85 & 125 GSM thick) for better surface finish with minimum abrasion of belt material.

Electronics & Communication

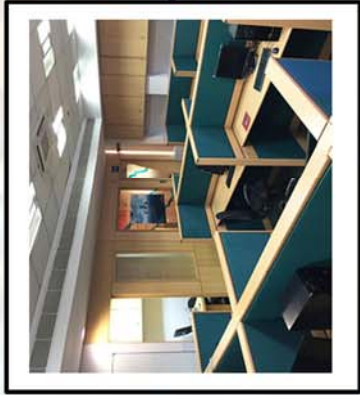

Design, Supply, Installation, Testing & Commissioning of Fire Detection, Alarm & Protection System, CCTV Security, Access Control, Boom Barrier, Optical Fiber LAN Network, Public Address System and PLC & VVVF Drives.

Supply and Installation of Signalling & Communication System for Indian Railways.

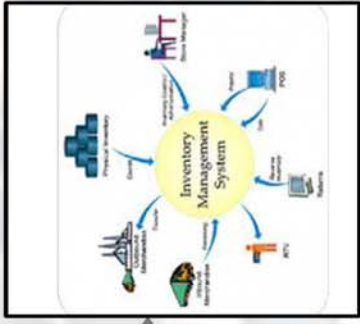

IT, ITES & IOT

IT, Networking and IT Enabled Services incl IoT, AI, Mobile gaming software, Improvement of NoC operational efficiency of mobile communication for reduction of Mobile Tower downtime.

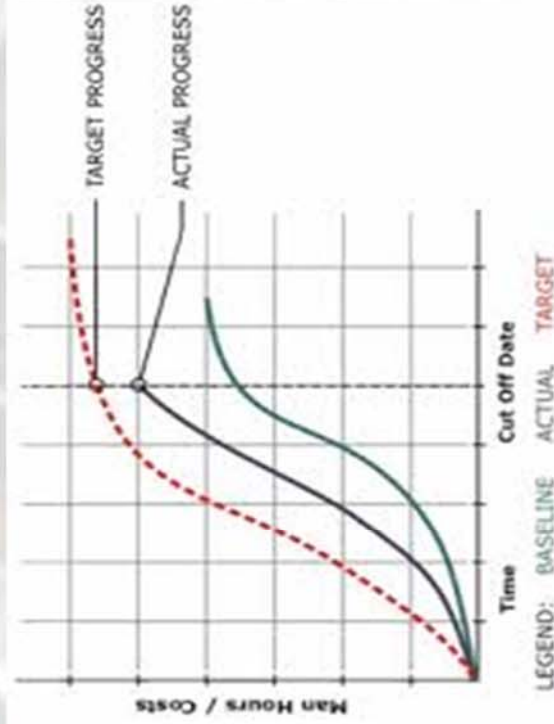

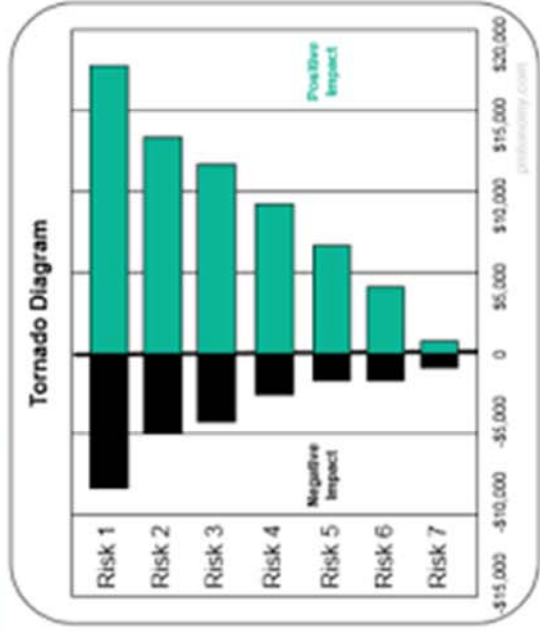

BPO setup with agents engaged in US mortgage online data management, Inventory management of Airport Authority of India, Kolkata Airport.

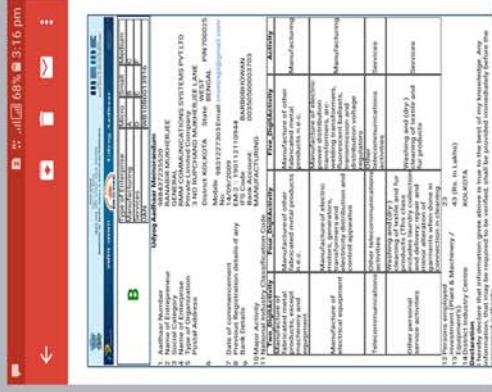

Project Management Consulting

Integrated Project Management services (concept to commissioning) including Time, Cost, Risk & Quality Management with experienced PMP professionals for core sector clients. Assistance for preparation Techno Economic Feasibility reports, Financial reports for Indian and Overseas clients.

Certification & Appreciations

Registration With

Engineering Export Promotional Council of India (EEPC)
: A Govt. of India Undertaking

Ministry of Micro Small and Medium Enterprises

Confederation of Indian Industry

Indian Chamber of Commerce

Indo German Chamber of Commerce

Major Clients We Served
